... 1957 ... *The Turning Point In*

Dedication:

Your El Rodeo staff wishes to dedicate this book, first and foremost, to all Poly students, faculty, and friends of the college . . . past, present, or future. You are the reason for El Rodeo '57's existence.

It would not be in keeping with the memory and spirit of "1956-57 at Cal Poly" if we did not make a secondary or "special" dedication — a dedication to the new Poly, the turning point, and the new era all rolled up into one — a dedication to the Co-ed, for she is much of the reason for all these new and different things.

So formally: "To the handful of females who have helped pave the way for future females, new buildings, and expanded scholastic programs . . . not to mention expanded social activities . . . this yearbook is pleasantly and joyfully dedicated."

Poly's History.

The turning point hit us this year . . . in many more ways than one. Surely, we'll all remember 1957 as the year we converted two dormitories, the gym, the cafeterias, and our manners to please the new co-eds.

But other "firsts" went into making of our turning point — A record Cal Poly "family" of 4,550 students and staff in the fall quarter, including the 200-plus co-eds; new occupational curricula, including addition of the Home Economics and Ag Education departments; and the prospect of a 33 million-dollar building program—these were the larger circles in which our turning point moved.

Cal Poly's President, Julian A. McPhee.

President's Message

Life consists of a succession of "turning points." This is true because neither men nor institutions can stand still; they go either forward or backward.

Cal Poly believes its function to be that of providing an occupational education for its students which will enable them to move steadily forward to achievement of an effective and successful life. To that end it has sought to provide you op-

portunities to become informed, to learn to think clearly to right decisions, to gain the knack of working with others, to know the value and dignity of hard work.

To the extent that you, the student, have profited from these opportunities, you will be able to face the turning points of life confident that your turnings will be upward and onward.

Julian A. McPhee
President

Through Others . .

The turning point took a swing in the direction of "straight" education with the addition of new instructors, administrators, and courses. The reasons for these additions were, among others, expanding enrollments and a new type of student . . . i.e., female.

But mainly responsible is the fact that while we may "learn-by-doing," we must certainly realize that we also learn by watching, and listening to "those who know how to do" . . . the instructor and the administrator.

Division of Agriculture

GALS IN AG were a welcome sight to the traditionally "all-male" division.

TWO AH'ERS, Deanna Dittnock and "Poly Prince," Poly's official mascot.

The turning point, namely the advent of girls in the Ag Division, was looked upon with mixed emotions by faculty and students alike. Some stoutly maintained that "Poly Ag" would be ruined, and others looked upon the change with a great deal of pleasant expectations.

Actually, girls have arrived for keeps, and except that they are competing very favorably with the boys in lectures and labs, there has been very little change. Those students and faculty who were inclined to believe that the girls would not wish to do their share of the less glamorous chores in agriculture, discovered much to their surprise that the fair sex can be counted on to excel even in the dirty jobs.

Progress continues to be the theme of the Agricultural Division with admission of girls in the fall of 1956.

BELIEVE IT OR NOT, girls were once a part of Poly's enrollment "way back when." Shown here, they're enjoying? what appears to be a lab session.

HISTORY REPEATS ITSELF with the modern version of the female of the species. Who knows — they might stay for good this time.

The Arts and Sciences Division met the turning point in a pleasant way, with the girls — nearly 200 of them in this division! With them came a curricular turning point, the addition of Home Economics, Elementary Education, and an expanded program for girls in Physical Education. The girls helped populate the division's new majors in Agricultural Chemistry and English and added a new look to the "old" major departments. Arts and Sciences' turning point has brought beauty and expanding enrollments.

Division of Engineering

NEW BUILDINGS, one being the new Engineering Building, the east wing of which is seen here, were part of Engineering's "turning point" at Poly.

NEW FACES, like the ones owned by these gals washing their hands outside the Printing lab, were seen in the Engineering Division.

Engineers like to think in terms of analogies. One of the favorites in the Engineering Division is the analogy between the art of sailing a boat and the progress of the division toward its objectives.

Sailboats make the maximum progress along their desired course when they have a strong wind astern and a calm sea ahead. However, they can still make progress through troubled seas and unfavorable winds—by tacking. This is the art of nullifying unfavorable components and utilizing the favorable ones to gain progress along the course.

There have been times when lack of facilities and other temporary problems have forced the Engineering Division to make its progress by tacking. With the addition of new facilities and the ever-increasing demand for engineers, the tacking periods are past. The turning point is behind. The wind has shifted astern. There is sure and quick sailing ahead.

HER MAJESTY BARBARA FOLEY

Barbara, a sophomore animal husbandry major, hails from Stockton, California. She became the first of Poly's own campus royalty to reign over Homecoming.

When work was over they sang the old ones and learned some new ones.

In October some of Poly's outstanding students went to the Leadership Conferences at Cambria. They worked, played, sang, ate and, in general, had a worthwhile and roaring time.

The theory of "learning-by-doing" was experienced by 3800-odd students enrolled at Poly this year. Instead of slackening with the admission of women, as some expected, the spirit of this theory increased . . . as shown partly by the heightened degree of participation in sports, activities, and student government.

Which may serve to show that "learning-by-doing" will always be prevalent at Poly . . . no matter how many turning points or new eras come along.

Cal Poly's ROTC Cadet Battalion formed.

Cal Poly's outstanding ROTC battalion continued its successful rise to prominence on campus when the current seniors returned to the college last fall with the number one rating after completion of summer camp at Fort Lewis, Washington. Of the 30 colleges and universities represented there from eight western states, Cal Poly's cadets ranked the highest in overall military proficiency. Today the Poly cadets rate on top . . . and they plan to stay there!

PATH OF THE GREEN MACHINE

The 1956 edition of the Cal Poly Mustangs returned to the football gridiron in fine style, handing Coach Leroy "Silver Fox" Hughes an impressive 25-7 opening game win over the San Francisco State Gators on the home field.

Next on the slate, and again with the advantage of home soil, was New Mexico A&M. The Aggies were stubborn, and halftime found an even 7-7 clash, but the final 32-7 score more than justified the efforts of the Hughesmen.

The Green and Gold next traveled south to meet the Pepperdine College Waves. The Waves were made to look more like mere ripples as the Mustangs battered them down to a crushing 45-0 defeat.

The following Saturday, October 13, found the local fans shedding tears as the San Diego State Aztecs won 7-6, rudely slamming the door on Cal Poly's bid for another perfect season.

As the 65-12 score indicated, the Mustangs were all fired up for the October 20th Homecoming tilt with Long Beach State. The game was just what the doctor ordered to soothe wounds acquired by the Mustangs during the previous week in their heartbreaker with San Diego.

Cal Poly was once more solidly entrenched in the win column. They met and defeated on foreign soil a very strong College of Idaho team by the narrowest of margins — 7-6 — in a true mud battle.

Jim Cox, San Francisco 49er pro draft choice, missing a close one against New Mexico A&M. This was a great night for Cox as he caught 7 passes for 131 yards and 1 TD.

It was home again to face the 200-pound-plus San Diego Marine Corps line. They were big, but so was Goliath — and Cal Poly's half of the 27-8 score. Although packing a hefty line, the Marines failed to contain Poly's talented backs, especially one Rudy Brooks, who ran for two of Cal Poly's four touchdowns. The bells failed to toll for the local gridders as they invaded Fresno State. The crowd of 11,000 experienced some fine football as both teams displayed their all. The score with 35 seconds remaining was Fresno 14, Cal Poly 13; the final score was Fresno 21, Cal Poly 13. The Mustangs, however, appeared hindered by the loss of Willie Hudson who was injured about halfway through the game. The San Jose clash was almost a replay of the Fresno game as Poly matched the Spartans touchdown for touchdown until the last five minutes when the Spartans tallied the deficit. The Mustangs were beaten only by the score, 35-28. Home and pay dirt for a climax. "Fitting," thought the fans as the Mighty Mustangs polished off Midwestern University 24 to 13, Thanksgiving Day. Fans found themselves amazed throughout the season by the pigskin-attracting fingers of Jim Cox, fine running and passing by Jerry Duncan and Bob Beathard, and weaving broken field running by halfback Rudy Brooks. These were only a few of the standouts that gained nearly 1000 yards more than their combined opponents.

Jim Cox was named second string "All-American," while Rudy Brooks received honorable mention "All-American." End Jim Cox, quarterback Jerry Duncan, and halfbacks Jim Antoine and Rudy Brooks were also chosen for the all-CCAA team.

Soccer

Ending the season with a 50-50, 3 win-3 loss record was the 1956 edition of the International soccer team under the hands of Bob Holley. Standout players included Vaoud Yassi, Avrelino Valez, Demetrio Pardo, Joree A. Villacorta, and Sam Mitchell.

CAGE REVIEW

The 1956-57 Poly Mustang Hardwooders, playing one of the most rigorous schedules ever to be considered by a Cal Poly basketball team, ended the season with a 12 win, 11 loss game record to place third in the California Collegiate Athletic Association conference. Although short, the tallest man being Dunn at 6-5, the Mustangs made a good account of themselves due to their spirit and hustle.

Besides regular league play, the Mustangs made an eastern trip to meet such cage powers as Bradley, Drake and Creighton University. They also hosted a Christmas Holiday Tournament held in Crandall Gym.

Standouts on the team were Atwood "Sonny" Grandberry, guard, and the only man to graduate this year from the team; and Theo Dunn, center. Both were unanimously picked for the CCAA first team. Dunn established 3 all-time school scoring records during the season, and Grandberry and Dunn shared another record, both sinking 13 free throws in a single game.

Other outstanding players on the team were Mike Simmons and Flemen Hardy, forwards, and Len Oswald, guard.

J. V. BASKETBALL

The Mustang Colts of 1956-57 had a good year. Under the guidance of Coach Jim Gilbert they won quite a number of games and lost others by close scores. The big men on the team were Arman Gunnerson, Steve Richie and Stewart Pritikin. All three of these boys played on the varsity at one time or another during the year.

MITTMAN REVIEW 1957

Cal Poly's first National champion, Eduardo Labastida, 112 lbs., one PCI champion, Bob Gow, 147 lbs., and a third place for the team in final PCI standings was a fine finish to one of the most successful years in Mustang boxing. In dual meet competition the glovemen also had a great season with five wins and a lone loss to San Jose State.

Outstanding on the team besides Labastida and Gow were: Ed Murakami, 112 lbs. PCI runner-up; Gordy Martinez, 178 lbs. PCI runnerup; and Don Adams, 165 lbs. Murakami, Gow and Adams also went to the N.C.A.A. National Tourney in Idaho.

BASEBALL

While O'Daniels has stated that his 1957 aggregation was "very thin," he expressed belief that the Mustangs showed marked improvement over last year. He was also extremely happy over the team's hitting power — no less than 11 hits in each of the first four games. Only six lettermen returned — Pitchers Ken Matson and John Freddi, infielder Owen Hand, outfielders Lew Gentry, and catchers Art Dyer and Walt Gurney. New-comers included Carl Underwood, Dick Machado, Navor Lopez, and Moco Tashima.

Track

ALONG THE CINDER PATH

Poor weather, causing lack of practice, has been the biggest problem to the track team. The Mustang runners, according to Coach James Jensen, are thin, but hold their own. Many of the new men could develop into dependable tracksters.

Outstanding men on the team are: Bob Heffron, sprints; Gordon Ustick, pole vault; Cliff Rowland, 440; Lynn Lloyd, distance; and Mel Hawkins, javelin. Heffron is one of the speediest men on the team, going the 100 in 9.8 and the 220 in 21.5.

Over the top.

More than 40 per cent of California Poly College's student body actively participated in the College's intramural program, reported Dr. Robert Mott, head of the Physical Education Department. Mott indicated that during the intramural basketball season 600 men competed on 40 teams.

Intramurals at Cal Poly are under the student direction of a physical education major and therefore develop a two-fold result: Benefit to the competitors, and beneficial training to the aspiring physical education instructors.

Calaveras Dorm

We first came to Cal Poly — all strangers from different parts of the globe. We were scared, but eager to gain new friends and achieve a college education. And as time progressed, we became pretty good buddies (darn good buddies!) We studied hard together, helping one another out whenever we could. We also played hard as a team in our intramural sports, and increased our ability to get along with our fellow man. The participation in dormitory projects showed that we were capable of working as a group.

We will also admit that we have had our share of laughs. We will remember our "friendly gags," and other harmless expressions toward one another, which all contribute toward a colorful college life.

Chase's main claim to distinction, this year, was the Co-ed party thrown for the girls of Heron Hall in the Chase lounge. This was the first such shindig on record, probably since 1929 when the last girls attended Poly . . . and the men of Chase have reason to believe that it was the first ever in Poly's history. Names of Chase inhabitants showed frequently on the rosters of most inter-collegiate sports. Chase also

entered intramural teams in football, basketball, and soccer.

The comparatively strong dorm organization, achieved mainly through the efforts of Dorm Manager Vic Buccola and the dorm officers, helped make Chase life a pleasant, educational, and memorable experience.

Heron Hall

Heron Hall on College Avenue has been re-done with a feminine touch to house the forty-six girls that represent Cal Poly's first freshmen women in a long time.

The girls have made a place for themselves and their dorm by winning the plaque for the best

Christmas decorations for '56, holding a party to celebrate the Chinese New Year with their two coeds from Hong Kong, and running a Poly Royal booth. They even received a porpoise as a gift from some well-meaning, but misguided admirers.

Hillcrest Dorm

Hillcrest Dormitory, commonly termed "Skid Row," must be the most unorthodox dorm on campus! It houses seniors, juniors, sophomores, and freshmen. All major departments are represented.

When one enters Hillcrest, he will see the spirit of Cal Poly's "learn-by-doing" in action. Each student helps the other and everyone profits from this . . . not only academically, but socially as well.

Courtesy and respect for the other man are the primary "learned" concerns of the Hillcrest Dorm inhabitant.

Entertainment for dorm inhabitants can be found in the dorm lounge where a TV set and ping-pong table are available, along with the latest magazines.

One of the high-lights of the year was held during the spring quarter when the dorm enjoyed its annual beach party. Swimming, sports, and eats were enjoyed by all.

Jespersen Dorm

Housemother Mae Nichols . . . Jespersen's advisor.

Jespersen Hall holds the honor of being one of the first two dormitories to be converted to femininity housing some of the first women students to be admitted to Cal Poly since 1929. The women of Jespersen organized early in the year with the aim of establishing their sex as participating members of the college community.

At the opening of the school year, Mrs. Charlotte "Mom" Smith, who graduated in the last co-ed class nearly 30 years ago, was housemother to the newcomers. An unfortunate accident caused her to be replaced for the winter quarter by Mrs. Mae Nichols.

Realizing that they are a pilot group, the girls of Jespersen have worked to set realistic and dignified precedents by which Poly co-eds of the future may be guided.

It's study time, and gals like Marty Faucet and Sue Raney hit the books.

Mariposa Dorm

As we will glance through the pages of our college life, there will be some events that will not leave our minds completely. Probably the most reminiscent of these is the participation of our dorm in intramural sports and our dinner dorm meetings. The credit of the dorm's success goes to our faithful dorm managers whose tireless efforts withstood the trials of freshman eccentricity.

Most of a Mariposa man's spring quarter time was spent at Avila.

PALOMAR'S MEN . . . the products of one of "The Hill's" finest dorms.

Palomar Dorm

Palomar Dormitory is located at the summit of the Mountain Dorms, affording an excellent view of the entire campus. Occupied by 95 "intelligent" young men, this dorm participates in a great variety of activities.

At the beginning of the year, the Dorm sponsored a successful social with the residents of the co-eds dorms. Palomar participates in intramural sports with a football team, two basketball teams, and a volleyball team.

One of the more memorable activities was a farewell party for fall quarter Dorm President Tom Kullunki.

SHASTA DORM . . . as strong as its namesake! A leader in wholesome activities for its residents, and an instigator of lifelong friendships.

In keeping with traditions set in previous years, this "mountain monarch" turned out one championship intramural football team in the fall quarter of the 1956-'57 school year. Their power remained constant throughout the various intramural sport seasons.

Men from every major are represented here. Through their combined talents, activities were able to be formulated that included every dorm

resident . . . an asset of accomplishment for future community life.

Shasta were barbecues held in the shadows of Among the vigorous and healthful activities of the Santa Lucia Mountains where the men could relax and let their hair down. The unitary working order of the dorm produced one of the finest Christmas displays on campus. All this was accomplished through the well organized dorm meetings.

Plumas ran the usual gamut of a freshman dorm this year. Studies, after-midnight bull-shooting sprees, and a liberal portion of wholesome recreation and activity filled the year for its inhabitants.

Composed mainly of agriculture students, the Dorm provided a spawning ground for some of Poly's future leaders.

Tuolumne Dorm

The most outstanding features of Tuolumne were the Dorm's autoshop, chess parlor, rodeo arena, pig pens, roving businesses, fire alarm, polo team, KATY, kitchens, beach parties, steam baths, ukelele jam sessions, Elvis Presley dart board, and the gymnast team which worked out regularly during study hours. What it all amounted to was a great experience and all-round "education" for a bunch of swell guys.

Tehama — which in Indian tongue means "hot low-lands" — has had a full year. There was a full season of real fellowship in which lasting friendships were made by men from far scattered portions of the state. American Society of Tool Engineers

Since its start in February, 1956, Cal Poly's chapter, or the twelfth student chapter of the American Society of Tool Engineers has increased steadily in membership. Majors in Mechanical and Industrial Engineering, interested in the methods and processes of manufacturing, make up the bulk of ASTE's members.

The Club often invites engineers and repre-

sentatives from industries to speak at the monthly meetings.

Opportunities in the Association to gain knowledge, education, and enjoyment include receiving ASTE's monthly technical journal, participating in field teams to manufacturing centers, and the increased possibilities for scholarship eligibility.

The Air Conditioning Club is one of Poly's most congenial engineering societies. The AC Club's float in the Homecoming Parade depicted the Poly football team as "Poly's Cooling Machine," which was quite appropos to the outcome of the game (Long Beach got cooled—65-12—but good!)

"Defrosting" for a change, the AC Clubbers staged a successful barbecue in Cuesta Park last fall.

Engineers from the major west-coast industries come to meetings, explaining the problems encountered and new types of equipment in use today. This year, the Club was fortunate in having on campus Carlyle Ashley, American Society of Refrigeration Engineering President, who spoke at a program held in his honor.

A majority of the credit for the success of the department's Poly Royal exhibition and Homecoming float, as well as the many Club-sponsored social functions, must go to Chairman Richard Morehead and his officers, whose resourcefulness and enthusiasm were a stimulating influence to all.

Boots and Spurs

Dis . . . MOUNT!

One of the largest clubs on campus, the membership of Boots and Spurs totals nearly 250 members. The club is made up of Animal Husbandry majors and persons interested in the livestock industry.

Its activities include monthly meetings with prominent men in the field as speakers, western dances, spring and fall barbecues, annual awards banquet, livestock show at Poly Royal, and field trips to different sections of California.

This year the club also sponsored a turkey shoot to help out the Ag. Council, and had an alumni vs. Judging Team livestock judging contest.

The party breaks up, as Canterbury members leave St. Barnabas' Church, where they had attended Vesper services, which included youth groups from distant points in the Tri-county area.

Canterbury club meetings are held twice a month on Sunday evenings and are always preceded by a home-cooked meal, prepared by women of the church.

Programs consist of panel discussions or seminars on practical, social or moral issues; slide films and movies on the church and its teaching; outside speakers from church or community groups; foreign students speaking on their homelands, and other topics of common interest to students.

Canterbury members participated last fall in "Religion in Life Week" at the campus, thus filling Canterbury's dual role as a church group and campus organization.

Christian Fellowship

Man, this is the life!

Cal Poly's Inter-Varsity Christian Fellowship strives to promote growth in Christian faith and service through Bible study, prayer, free discussion and fellowship. The group meets once each week. Inter-Varsity welcomes those of all faiths, and those who have no church connection.

Guest speakers, music, conferences with other college Inter-Varsity groups, dormitory Bible studies and prayer meetings are all a part of Inter-Varsity activities . . . "that in all things Christ shall have the pre-eminence."

Circle "K"

Circle "K", the college Kiwanis, has just completed another meritorious year. The membership this year has increased tremendously.

Circle "K" members served their community in numerous ways. The projects undertaken this year included the maintaining of the information booth, as well as the trophy case. During the holiday season the Club decorated the main lobby of the administration building. The group worked with the Chamber of Commerce during the "Bar'bary Coast" and also assisted their Kiwanis sponsors by serving at their installation banquet.

With this year's active officers, the organization has exercised its international motto "We Build."

The Cal Poly Farm Center, celebrating its second year in 1956-'57, doubled its membership, making it the largest non-departmental club on campus and one of the largest and most active clubs of the college. The Club also holds the distinction of being the first collegiate Farm Center in the nation.

This year, the Farm Center hosted the State Farm Bureau Staff Institute, sponsored the Poly Royal adult judging contest, participated in a field trip to the State Legislature and the State Farm Bureau building, sponsored several dances, including the first school dance of the year, and presented an exhibit at Poly Royal.

The Poly Farm Management Club was officially formed and recognized in September of 1956. Among its goals is the aim of providing recreation, education, and activity for Farm Management students.

Club members participated in a Farm Management course called "Successful California Farm Operations," invited California agriculture experts to speak

on farm management problems, and staged a successful Farm Management banquet in March, 1957, at the Monday Club. The members also entered a float in the Homecoming Parade, and put on a display during Poly Royal. These among other activities and events, made the Farm Management Club's first year a productive and eventful one, to say the very least.

Future Farmers of America

Cal Poly's Collegiate FFA Chapter was chartered in 1947 to act as a consolidating organization for interested, prospective agriculture teachers from other agricultural departments. Activities carried on by Chapter members are designed to provide a "learn-by-doing" opportunity for those interested in Vocational Agriculture teaching.

One of the major aims of the Collegiate Chapter is to train prospective agriculture teachers in their duties as advisors of FFA chapters.

Experiences gained through the Chapter enable the future instructors to be better fitted for their advisory duties.

The IAS, organized in 1932 as a professional society dedicated to the advancement of the aeronautical sciences through exchange and evaluation of technical ideas, sanctions student branches on major college campuses. These serve as social and technical steppingstones to associate

fellowships in the national organization. Cal Poly's chapter joined as a student branch in 1950.

Activities for the current year included a float in the homecoming parade, a smoker, the IAS banquet, and participation in the regional student conference and Poly Royal.

And they'll be talking for a long time about their Poly Royal exhibit, the crops judging contest, and the success of the student orientation.

On May 4, 1948, the first campus charter issued by a professional society was awarded to the student branch of the Institute of Radio Engineers. During the past year, another first occurred: Interest groups, similar to those of the IRE, were established on campus.

Semi-monthly meetings with guest speakers and social activities ranging from the Student Bulletin, barbecues, dances, Homecoming, Poly Royal, intramural sports . . . to the final banquet . . . helped make the student branch a successful organization.

With a membership representing nearly every country in the world, Cal Poly's International Relations Club has served as both a social and service organization. During Fall quarter they shared in the Cal Poly Women's Club International Night and were hosted in numerous staff members' homes for dinner, followed by a party in the Student Union.

During winter quarter, they again joined forces with the Women's Club to assist in putting over the big "Foreign Fashions Festival" held in the Veterans' Memorial Hall. For spring quarter, they threw their own international day, extending an invitation to the entire campus to participate in events. Regular meetings have been programmed for better international understanding with members participating as speakers.

The Mustang Flying Association was founded in March 1946, for the purpose of providing the pleasure of flying to all Poly students and faculty at a minimum expense.

During the past year, the Club received word that it was awarded an Honorable Mention in the National Flying Club safety contest, and a ninth place in the State. The Club's mission is to act as a training ground for future flying executives, salesmen, and others who find that flying can be pleasurable and beneficial to their careers.

Mechanical Engineering Society

The Mechanical Engineering Society is primarily a social group for Mechanical Engineering students.

The Society attempts to provide its members with various social and academic activities that are not in the regular curriculum. These activities include smokers, beach parties, field trips to centers of industry, and sponsored dances. Besides these, the Society's members (enthusiastically) construct a Homecoming float which always is an eye-opener and a sure winner.

The Society cooperates fully with all other Mechanical Engineering technical clubs, especially when a mass effort is needed for either technical or social reasons.

Poultry Club

Cal Poly's Poultry Club serves to organize those students at Poly who are interested in the poultry industry and its allied fields. Prominent members of California industry are featured guests at the regular meetings. Annually, the Club sponsors a get-acquainted meeting, a float in the Homecoming Parade, a dance, the Alumni Turkey Banquet, and the Spring Barbecue. The Club also sponsors the Poultry Show during Poly Royal and a bowling team. Many of the Club members participate in intramural sports. During the spring quarter, qualified members of the Poultry Club visited many poultry ranches and allied business concerns on the Annual Spring Field Trip.

School year '56-'57 was one of growth and improvement for Mat Pica Pi: Membership rose to an all-time high of 80, 75% of the printing department enrollment; a new constitution and bylaws were framed to fill the needs of an expanding organization; and alumni groups were formed in the Los Angeles and San Francisco areas.

Graduates and pin-wearing members are spreading the name of Mat Pica Pi to the four corners of the United States, and one grad is now employed in Germany. Not bad for an outfit just six years old.

As the Club grows, so grows the reputation. Mat Pica Pi alumni have done their jobs well in spreading the name . . . and more and more job opportunities are opening up for Cal Poly's printing engineers.

Poly Phase

The success, this year, of the Poly Phase Club can be attributed to the high spirit of the club members, as well as the cooperation of the departmental faculty.

The time and effort of the members on this year's Homecoming float entry — a robot machine, producing co-eds — were well rewarded. This sweepstakes winner marked the fourth victory in succession for Poly Phase.

A well-planned schedule of events ensued throughout the year. Among these were the Christmas party, Club smoker, barbecue, dinner meetings with speakers, intramural sports, and Annual Year-End Banquet.

The Phasers' fourth straight, sweepstakes-winning Homecoming float created quite a stir while passing through town.

Poly Phase's electrical manufacturers' exhibit won a \$500 scholarship in competition at Los Angeles.

Poly Phase people and guests enjoyed themselves at the Annual Year-End Banquet.

American Institute of Electrical Engineers

The Cal Poly branch of the American Institute of Electrical Engineers was chartered February 22, 1956, and gained immediate distinction by winning top honors in the Los Angeles Section student prize paper competition sponsored by the National AIEE. The purpose of the branch is to disseminate knowledge of the theory and practice of all aspects of electrical engineering and allied fields.

Present activities include free tutoring services for all students taking EE courses.

Press Association

Press Club got off to a quick start this year with their annual get-acquainted barbecue for new Ag Journalism majors, originally scheduled to be held in Poly Grove. Rain caused a quick re-shuffle that brought the party into El Corral. Besides attending weekly meetings of the Club, and hearing the words of authorities of journalism and allied fields, the Club members participated in the selling of football programs and Herdbook advertising.

High point of the year was the Fifth Annual Agricultural Press Banquet held at the Edna Farm Center on Saturday night of the Poly Royal weekend. Featured guest was Louis A. Rozzoni, President of the California State Farm Bureau Federation, who's topic was "What California Agriculture Needs From California Journalists."

Rodeo Club

The Rodeo Club of Cal Poly has been active since 1949 and has participated in inter-collegiate events throughout the west. Members own their own roping stock, and plans are underway for a new and larger arena.

Scabbard and Blade Fraternity

The Company "H," 13th Regiment (Cal Poly chapter) of the National Scabbard and Blade Military Honor Society was officially recognized in the summer of 1956. The purpose of the society is to raise the standards of military training in American colleges and universities, to encourage and foster the essential qualities of competent and efficient officers, and to promote fellowship among the cadets and future officers.

Scarab, an honorary architecture fraternity, was established at Cal Poly in 1953 as one of the ten chapters across the country. Nationally, Scarab brings together student leaders in Architectural schools for the benefit of themselves and their schools.

This year, Scarab designed and constructed the Annual San Luis Obispo County Art Show sponsored by the local chapter of the American Association of University Women.

Ski Club

The Cal Poly Ski Club provides an organization in which skiers may come together to discuss their beloved sport, skiing. The club members plan ski trips and varied social activities.

During the 1956-1957 school year, the membership increased very rapidly due to a growing interest on campus in skiing. Club events include trips to Yosemite and other ski resorts, competition with other ski clubs, and a water ski exhibition during Poly Royal. Future plans call for a more stimulated interest in skiing, so Cal Poly will soon have a ski team to compete in the many intercollegiate ski meets.

Society of Automotive Engineers

The Society of Automotive Engineers is a technical society for those engaged in the development, design, production, operation, and maintenance of passenger cars, trucks, busses, aircraft, railroad equipment, tractors and machinery, their component parts, fuels, and lubricants. The term "automotive" embraces all these areas.

SAE extends to its student members most of the services its members receive. It provides them with tools, which, if properly used, will help them to advance as engineers. The student members are kept up to date on new practices and techniques of industry through the SAE journal and speakers from various engineering fields.

Cal Poly's student branch boasts fourth largest membership in the nation, and will be on top before long.

Square and Compass Club

The Square and Compass Club was organized in 1949. Its purpose is to foster social and fraternal relationships among the Master Masons on the campus.

All Master Masons who are in good standing with a lodge recognized by the Grand Lodge of California, and who are associated with California State Polytechnic College, are eligible for active membership.

Woolgrowers Association

The Cal Poly Wool Growers Association, a branch of the California Wool Growers Association, is dedicated to the improvement of the sheep industry in the state and nation.

During the year there are field trips to observe various types of sheep operations in the state.

Tau Sigma

The Tau Sigma Engineering Honor Society of Cal Poly has been organized to recognize outstanding students in Engineering.

The aims and purposes of Tau Sigma, similar to those of national engineering honorary societies, are the promotion of high scholastic standards and development of those personal and social qualities which distinguish the successful professional man.

Members are chosen from the upper one-third of the engineering division on the basis of scholarship, practicability and sociability.

Soils Club

The Soils Club was formed with a dual purpose: To unify Soils majors; and to stimulate social activity in the Soils Science department. The Club rostered 46 members this year.

1956-'57 Club activities included a float entered in the Homecoming Parade, a Poly Royal exhibit entitled, "Rebirth of Soil Conservation," a

barbeque in Cuesta Park, and the handling of a land judging program for high school FFA students.

High point of the year was the Annual Soils Club Banquet held April 27, Saturday night of Poly Royal, in the Anderson Hotel.

Young Farmers

Young Farmers hit fertile pay dirt again this year through a continuous program of activities on and off campus. Their leadership in Future Farmers of America was the highlight for the school year, extending from on campus affairs through regional activities.

As a part of their annual program, they again conducted another successful Statewide F.F.A. meet at Cal-Poly. Through the years, their affairs continue under the advisorship of effervescent Carl Beck.

Gamma Pi Delta

Gamma Pi Delta, honorary agricultural fraternity, stresses character, leadership, and scholarship to prepare members for full service in school and in future life. This year the fraternity published the Herd Book (student directory) conducted its semi-annual community projects, held its annual alumni breakfast, and helped with freshman orientation.

Mr. Loren Nicholson, Advisor

Along with the new look on campus came the new look in your El Rodeo. Extended use of activity pictures, because there was more activity; an expanded book, because there was more to say; the turning point and curved pictures, because . . .

A yearbook is produced either by one person, or by a close-knit group of people all working together. A close-knit group is responsible for your El Rodeo '57 . . . it could have been produced no other way.

Along with the other staffers, Sales Manager Mike Blackburn, not pictured, is the person responsible, not only for the sales campaign pictures of the gals that you seemed to like so well, but for the present position of this book . . . in your lap.

Her Majesty Dottie Fuller, queen of the ROTC Military Ball.

The five finalists selected from the 21 applicants for Military Queen. Left to right: Dottie Fuller, Elyse Studt, Joyce Joinville, Susan Melin, Anne Boysen. The ROTC battalion elected Dottie Fuller Queen from these five.

1957 EL RODEO SWEETHEART, as chosen by you, is Dottie Fuller, a Sophomore majoring in Bio Science, and hailing from Grover City. Dottie was elected Yearbook Sweetheart by the votes of purchasers of El Rodeo '57.

RUNNER-UP Penny Bell's picture sold a lot of yearbooks.

RUNNER-UP Val DeGeus has a smile that reluctant El Rodeo buyers just couldn't resist.

RUNNER-UP Jan Lovett helped boost the sales by word-of-mouth, and by her picture being on posters scattered all over campus.

Poly royalty goes western. Left to right: Jan Angell, Pauline Woods, Karna Thorson, Val De Geus, Dorothy Tullock.

The spotlight is on the sixteen coeds who ran for Queen of Poly Royal.

Pat Henderson casts her vote for Queen of the "campus country fair."

Majors and Minors croon their way through the Queen's Assembly.

Poly's championship judging team. Left to right, Front Row: R. T. Johnson, B. Wilson, J. Drewry, W. Barnes, J. Varian, G. Settrini. Back Row: B. Kays, T. Brown, F. Anderson, G. Conlon, J. Smith.

Round and round the floor they go at the Poultry dance.

Poultry dance turned into a big production when dozens of chicks hatched.

The Collegians relax, making music.

Armed with about one mile of one-inch pipe, 19,000 nuts, bolts and washers, Poly's architectural department constructed the first permanent geodesic dome on the West Coast.

The FFA convention gave the aggies a pretty full week in May.

Graduation is one of a series of turning points in a person's life. Its ultimate importance to the individual is dependent, to the greatest extent, upon what he or she encounters and remembers during college life.

During life at Poly, "learning by doing" and "learning-through-others" practically force the student to encounter much knowledge in many forms . . . and he remembers graduation as one of life's "tightest" turning points.

Spring Activities

. . . but it **always** rains on Spring registration day.

The College Union jam sessions cultivated new interests and rejuvenated old.

Polyites went hillbilly for the Dogpatch Social.

A silver anniversary, the Science Fair, the Firehouse Five Plus Two, and a "home-grown" Queen were among the features that rated on the "first" list of 1957's Poly Royal.

Twenty thousand guests, alumni, and friends of Poly saw a horse show and a two-day intercollegiate rodeo, watched baseball, ate some barbequed steak, pitched pennies and dimes at the carnival, and danced themselves ragged at the Carnival Dance, the Rodeo Trophy Dance, and the Coronation Ball.

These and other activities, plus some good weather for a change, all contributed to the success of this year's Poly Royal — the twenty-fifth in Poly's history.

Poly Royal

Princess Karna Thorson, freshman Home Economics major from Weiser, Idaho.

Princess Jan Angell, sophomore Home Economics major from Los Angeles.

Princess Dorothy Tullock, freshman Home Economics major from Templeton.

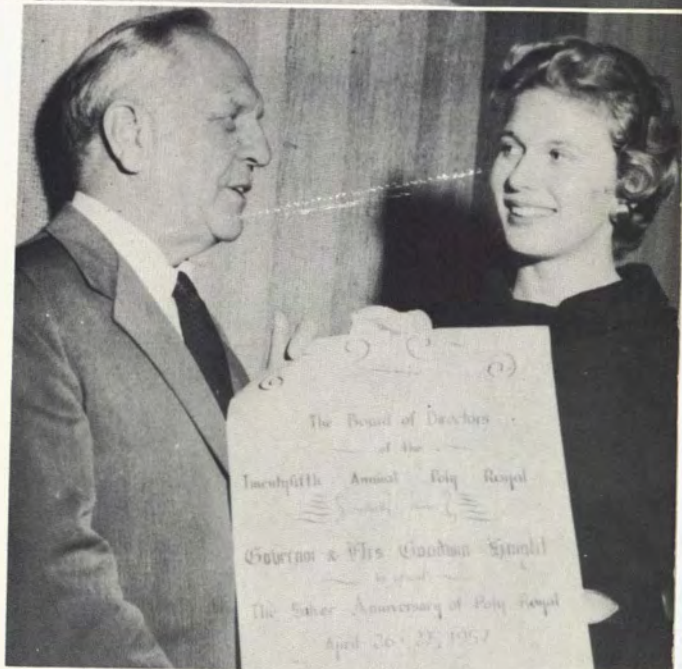

Princess Pauline Woods, sophomore Agricultural Journalism major from Fortuna.

1957 POLY ROYAL QUEEN . . . VALERIE DE GEUS . . . a junior Elementary Education major from Santa Maria . . . the first of Poly's "own" royalty.

Val speaks . . . and ears perk up!

Poly's Queen Val met California's Governor Knight with an invitation to attend the 1957 "country fair."

A royal tour taken by Poly's princesses.

Friday's parade kicked off at one o'clock.

The Math department tried hard for new majors.

Friday's celebrities arrive . . . the famous dixieland Firehouse Five Plus Two.

Queen Val leads a packed parade.

Some young scientists-to-be get some tips from the Science Fair.

All at once it's Friday, April 26th!

Val pulls the rope . . .

. . . the canvas drops down . . .

. . . and the 25th annual Poly Royal opens its doors to 20,000 guests.

Above: Individual math contest winner, Stanley Klein from Chaffey high school in Ontario, receives his award from President McPhee.

The Firehouse Five Plus Two . . . count 'em, there's seven.

Somebody's missing, there's only six.

Going "gone" at the Firehouse assembly.

Like the sign says, "science is everywhere" at the Science Fair.

. . . which all proves that the younger generation goes for dixieland jazz.

Parker spurs for points.

All it takes to be a dogger is a lot of muscles and sharp-heeled boots . . . plus skill and plenty of guts.

Hoot goes outside.

Carnival row — jammed with people and lights.

Some people have to pound out their frustrations.

Pitching pennies for a panda.

The things people will do for a ten-cent straw hat!

A tot takes a turn at the ring toss.

The Firehouse Five Plus Two gets the carnival dance off to a swinging start.

Taking it easy with a slow one.

Then the music gets hot . . .

Whew! Let's just listen after that one.

"Boy, the steak that must be on one of those things!"

Explanation and demonstration went along with the exhibits.

The EE boys performed magic with electrical waves.

Architecture's hanging fireplace kept people warm on an already hot weekend.

Saturday the 27th ...

Poultry department's egg show drew a crowd of spectators.

The Ag Engineers staged an irrigation demonstration.

Dr. Gillette explains the forage crops display.

"Number 5, red. Place your bets."

A large crowd of females showed their mechanical ingenuity at the Ladies Nail-Driving Contest.

Must be a good animal. The shorter and blockier they are, the harder it is to move them.

International Relations display featured many exhibits from different countries.

Horse hooves paw turf normally used for gridiron scrimmages.

The Flower Show was a great attraction to part-time horticulturists.

The Showmanship Competition drew many animals, exhibitors, and spectators.

For a buck-and-a-half a plate, the barbeque had to be good . . . and it was!

Looks like a pretty hot engine! The hot rod display drew a lot of auto enthusiasts.

SAFE! Poly's Gentry slides in under a Westmont throw.

St. Mary's man bats a fly into the Poly outfield.

The crowning of Queen Val DeGeus highlighted the crowded Coronation Ball, and copped a sensational Poly Royal weekend.

Activities viewed from the window of Joan Newcomer's office.

Oh, for the life of an athlete!

"Damned grounds."

No co-operation in the colt class.

They didn't get rich, but the Bilko dance was a huge success.

Whew! Classes are getting rougher.

It's study time . . . right after class it really sinks in.

Main means of motion at Poly—bicycles . . . pogo sticks . . . and feet.

. . . knew I should have done it last night.

Hmmm, looks like Avila time.

He flies through the air with . . . ?

Come on, you can cut that class.

Lines, lines, lines . . .

The turning point is here and gone — coeds are at Poly to stay and the transition is complete.

Incoherences:

HAH! IT'S DONE!

Not to say it hasn't been fun . . . far from it: Delivering these 208 pages into your hands has at times been an interesting and enlightening experience. But we're still glad it's done.

You know, the job wouldn't be finished yet if it hadn't been for some long hours put in by a lot of people . . . a lot of time spent that could have been used more pleasantly at Avila, the Fremont, or Barr's. I'd like to sort of "pay tribute" to the people who gave us, or rather, who gave YOU this valuable time.

First off is the Staff: Jeff McGrew, who actually acted in the Associate Editor capacity, and who also, by the way, is responsible for the rhythmic line layout style that dominates your book; Karen White, who was always "in a hasty mood," but nevertheless got her sports section done in fine style; Phyllis Read, with her three activities sections and missing pictures; Jean Thomas, who left us at the end of fall quarter, but still completed most of the senior section; Eileen McGrew, whose "blessed event" caused the McGrew mentioned above much alarm; Sonya Woods, who worked like a slave and still managed to stop smoking (her average had been 3 cigarettes a day); Mike Blackburn, who boosted the sales average some two or three hundred books, and who also was either directly or indirectly responsible for the sale of the book in your hand; Ray Lott, Jan Lovett, Pat Gogerty, and Marilyn Sawyer, who bird-dogged in the final laps.

Special thanks goes to Chuck Lotspeich for his division pages . . . the silhouette ones. Chuck worked on a volunteer basis, giving us what we feel is one of the outstanding features of the book.

A lot of gratitude is due Mike Mattis and his News Bureau photographers . . . especially Pat Keeble and Al Sales. The 1350 pictures in the book took something out of all of them.

It might also be said here that we, the Staff, don't believe there is a finer outfit to work with than the Yearbook house of Monrovia, California. Bill Hubbell and his boys put up with some pretty rugged problems and headaches, liberally supplied by us.

A final note of appreciation goes to Mr. Loren Nicholson, Yearbook Advisor and a newcomer this year to the Agricultural Journalism sphere. He pitched in like a staffer and made things a lot easier. (Actually, it's **Mrs.** Nicholson we want to thank—she kept us in food and coffee during those long pre-deadline nights). Thanks an awful lot to both of you.

That's about it. It was quite an experience . . .

. . . HAH! IT'S DONE!
